

Destination Charging Solution

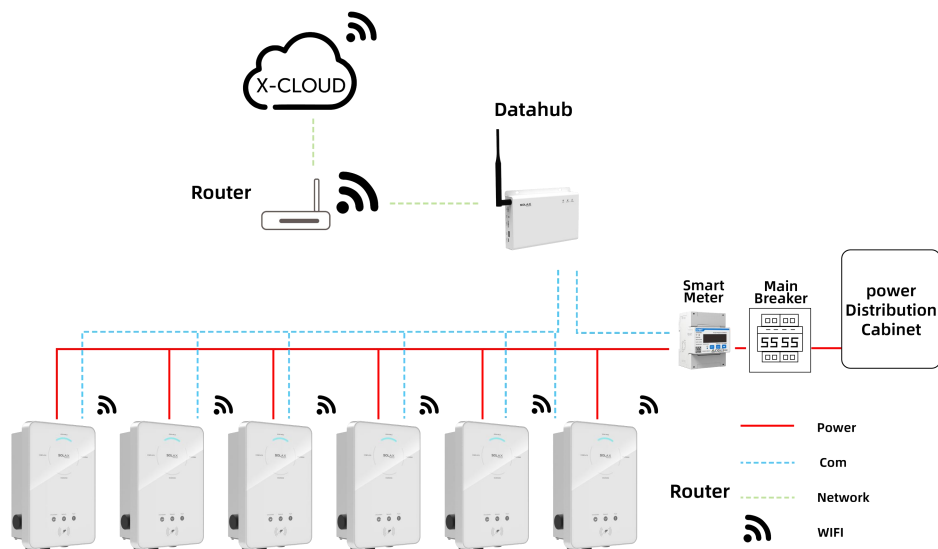

Background Introduction

Destination charging solution is a kind of charging service based on the travel demand of electric vehicles, mainly for the situation that electric vehicles stay at the destination for a long time and need to charge to replenish power.

For the destination charging scenarios, we provide complete charging solution which consists of EVSE, Monitoring Platform, RFID management solution, Load balance solution, Pedestal solution.

Solution

1. Overview

As we can see products and platforms included in the above solution are:

- EVSE: AC EV charger (7/11/22 three power selectable, support most EV on market)
- Monitoring platform: real-time monitoring EVSE and manage each charging section.
- RFID management: manage user's setting and charging history.
- Datahub: can manage each EVSE's power to prevent charging station to trig the power limit.
- Pedestal: support EVSE outdoor installation.

Note:

(1) Compatible Version: Home Commercial and Mix edition.

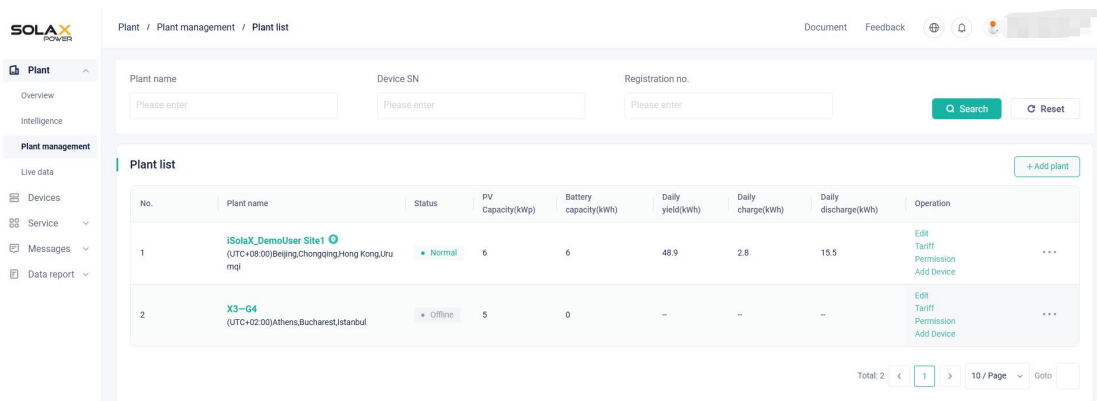

(2) Both EV Charger need to be of the same model and same rated power.

Relevant products and platforms used in the solution

1. EVSE

Product Overview	Feature
	7kw / 11kw / 22kw optional
	Plug and Socket type optional
	Integrated Residual current monitoring (30mA AC & 6mA DC)
	Integrated with PEN protection for UK region products TLS secure encrypted communication
	Indoor and outdoor easy installation
	Support Plug&Charge, RFID, APP multiple authorization
	Support APP and portal remote setting and monitoring
	Charging power setting adjustable
	Support smart dynamic load balance control
	Support Modbus and API control
	Support OCPP1.6j to integrate with OCPP platform

2. EVSE management cloud

The screenshot displays the SOLA X EVSE management cloud interface. The top navigation bar includes the SOLA X logo, a breadcrumb trail (Plant / Plant management / Plant list), and links for Document, Feedback, and user profile. A sidebar on the left contains navigation options: Plant (Overview, Intelligence, Plant management), Live data, Devices, Service, Messages, and Data report. The main content area features a search bar with fields for Plant name, Device SN, and Registration no., along with Search and Reset buttons. Below the search bar is a table titled 'Plant list' with columns: No., Plant name, Status, PV Capacity(kWp), Battery capacity(kWh), Daily yield(kWh), Daily charge(kWh), Daily discharge(kWh), and Operation. The table contains two entries: 1. 'iSolaX_DemoUser Site1' (UTC+08:00)Beijing,Chongqing,Hong Kong,Urumqi) with status 'Normal', PV Capacity 6, Battery capacity 6, Daily yield 48.9, Daily charge 2.8, and Daily discharge 15.5. 2. 'X3-G4' (UTC+02:00)Athens,Bucharest,Istanbul with status 'Offline', PV Capacity 5, Battery capacity 0, and all other metrics at 0. The bottom of the table shows a pagination bar with 'Total: 2', '1' selected, and '10 / Page'.

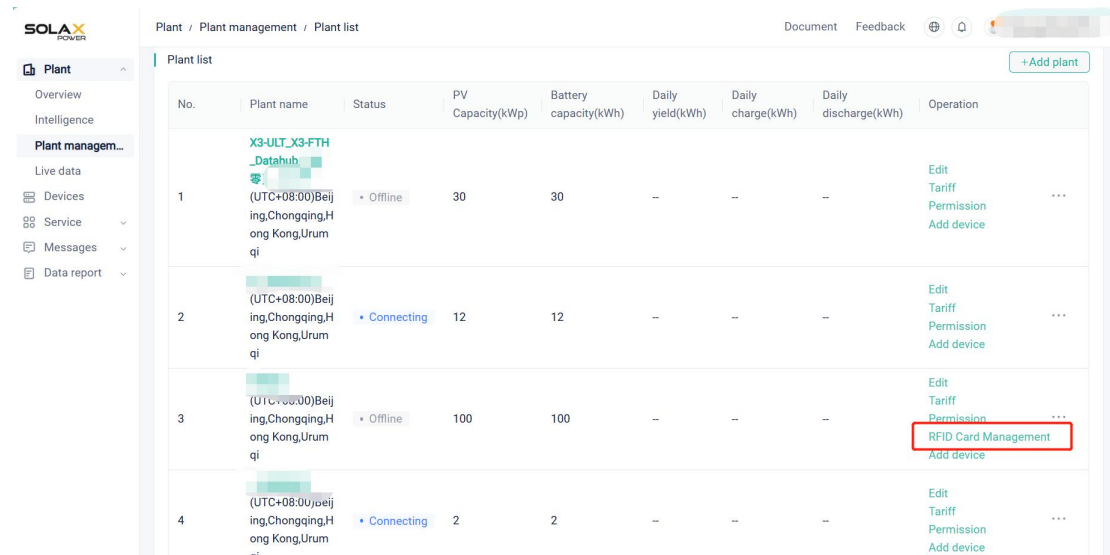

On the cloud platform, we can manage and monitor EVSE real-time work status, check the station charging history and manage RFID(user) setting and charging

record.

3. RFID management and operation

Step1: RFID management

RFID management access port: Sites list – Operation–RFID button

No.	Plant name	Status	PV Capacity(kWp)	Battery capacity(kWh)	Daily yield(kWh)	Daily charge(kWh)	Daily discharge(kWh)	Operation
1	X3-ULT_X3-FTH _Datahub (UTC+08:00)Beijing,Chongqing,Hong Kong,Urumqi	Offline	30	30	--	--	--	Edit Tariff Permission Add device
2	(UTC+08:00)Beijing,Chongqing,Hong Kong,Urumqi	Connecting	12	12	--	--	--	Edit Tariff Permission Add device
3	(UTC+08:00)Beijing,Chongqing,Hong Kong,Urumqi	Offline	100	100	--	--	--	Edit Tariff Permission RFID Card Management Add device
4	(UTC+08:00)Beijing,Chongqing,Hong Kong,Urumqi	Connecting	2	2	--	--	--	Edit Tariff Permission Add device

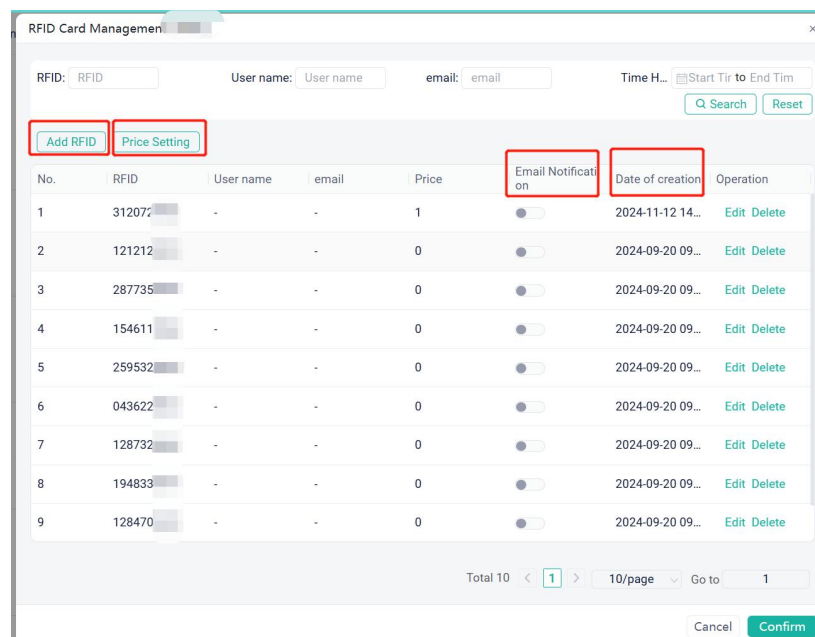

Step2: Basic setting

(1)Add RFID: add RFID user information and price select.

(2)Price setting: support 3 different charging price

(3)Email notification: support email notification, only start charging only after confirm on smart phone.

(4)Operation: edit or delete RFID user

No.	RFID	User name	email	Price	Email Notification	Date of creation	Operation
1	312077	-	-	1	☐	2024-11-12 14...	Edit Delete
2	121212	-	-	0	☐	2024-09-20 09...	Edit Delete
3	287735	-	-	0	☐	2024-09-20 09...	Edit Delete
4	154611	-	-	0	☐	2024-09-20 09...	Edit Delete
5	259532	-	-	0	☐	2024-09-20 09...	Edit Delete
6	043622	-	-	0	☐	2024-09-20 09...	Edit Delete
7	128732	-	-	0	☐	2024-09-20 09...	Edit Delete
8	194833	-	-	0	☐	2024-09-20 09...	Edit Delete
9	128470	-	-	0	☐	2024-09-20 09...	Edit Delete

Step3: Add RFID / Edit RFID

Operation: edit or delete RFID user

Step5: Charging history management

You can set a time range to view and export a report of the relevant charging status during that time.
