

End-User Warranty & Extended Warranty Operations

Background

The document outlines the processes and requirements for product warranty inquiries, upgrading warranty, and applying for extended warranty services. This document serves as a practical guide for end-users to understand timelines and procedures, ensuring a seamless and transparent after-sales experience.

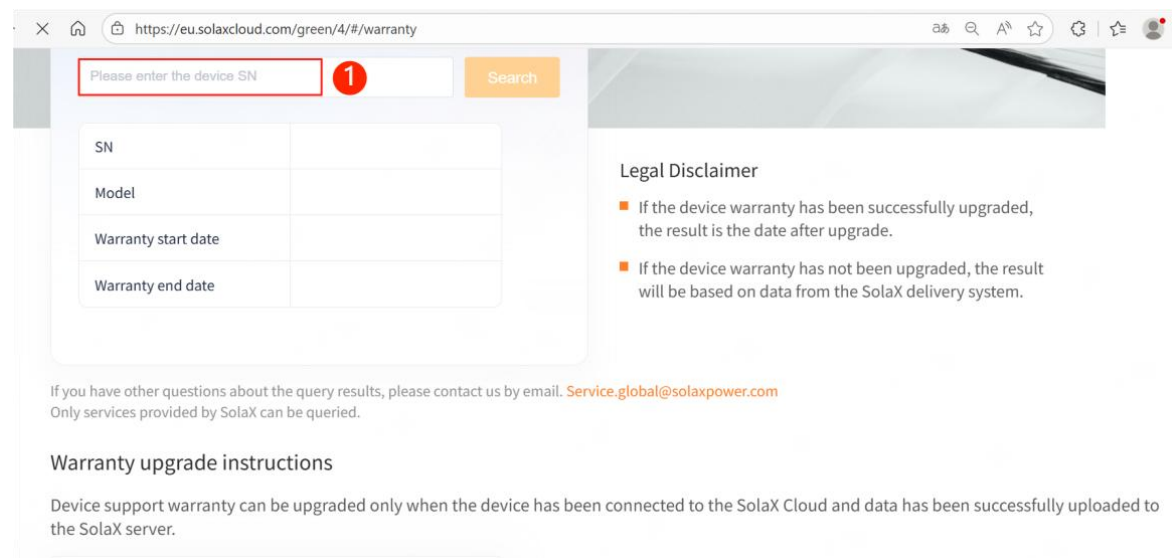

Warranty Inquiry

To enhance customer experience and after-sales service efficiency, SolaX provides a user-friendly online warranty inquiry portal on the official website.

Inquiry link: <https://eu.SolaXcloud.com/green/4/#/warranty>

Inquiry steps are as follows:

1. Entering the serial number (SN)

The screenshot shows the SolaX Cloud warranty inquiry portal. The browser address bar displays <https://eu.SolaXcloud.com/green/4/#/warranty>. The main content area features a search bar with the placeholder text "Please enter the device SN" and a red box around it, with a red circle containing the number "1" next to it. Below the search bar is a table with four rows: "SN", "Model", "Warranty start date", and "Warranty end date". To the right of the table is a "Legal Disclaimer" section with two bullet points: "If the device warranty has been successfully upgraded, the result is the date after upgrade." and "If the device warranty has not been upgraded, the result will be based on data from the SolaX delivery system." At the bottom, there is a "Warranty upgrade instructions" section with the text: "Device support warranty can be upgraded only when the device has been connected to the SolaX Cloud and data has been successfully uploaded to the SolaX server."

If the device warranty has been successfully upgraded, the result will display the warranty start and end dates after the upgrade.

If the device warranty has not been upgraded, the result will be based on the SolaX delivery system, and display the start and end dates of the standard warranty.

2. If a customer requires Warranty Upgrade confirmation or Extended Warranty Procedures, clicking the "Click to jump" button will navigate to the SolaXCloud Platform login page.

Legal Disclaimer

- If the device warranty has been successfully upgraded, the result is the date after upgrade.
- If the device warranty has not been upgraded, the result will be based on data from the SolaX delivery system.

If you have other questions about the query results, please contact us by email. Service.global@solaxpower.com
Only services provided by SolaX can be queried.

Warranty upgrade instructions

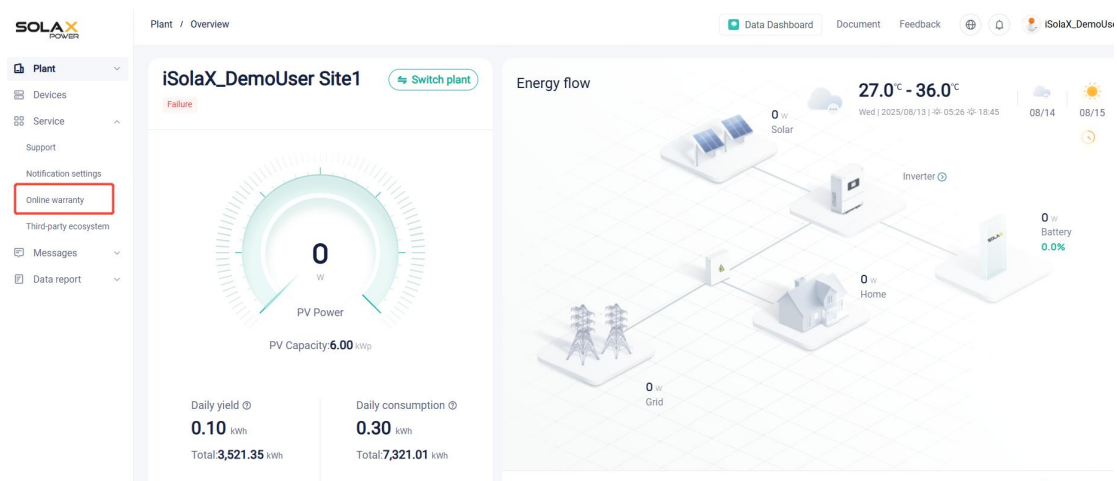

Device support warranty can be upgraded only when the device has been connected to the SolaX Cloud and data has been successfully uploaded to the SolaX server.

SolaX Cloud
Log in to upgrade your warranty **Click to jump >** **2**

After logging in, refer to the next section for detailed instructions about Warranty Upgrade and Extended Warranty Procedures.

Warranty Upgrade

1. Log in to your end-user SolaXCloud account.
2. Navigate to Service > Online Warranty, select the target device and the device warranty will be updated automatically when the device is online.

3. For upgraded warranty devices, the operation panel displays Edit, Download (Warranty Certificate), and Purchase Extended Warranty icons.
